EDUCATION

Asansol Engineering College - Asansol

Sep 2022 - Jul 2026

Bachelor of Technology in Computer Science & Engineering

Burnpur Boys High School - Burnpur

May 2020 - May 2022

Higher Secondary Education

SKILLS

Languages : C/C++, Java, Javascript, **Typescript**, Python

Frameworks: **NextJs**, **ReactJs**, **NodeJs**, ExpressJs, FastAPI

Databases : MySQL, PostgreSQL, MongoDB

Tools : **Git**, Vercel, Postman, **Docker**, Cloudflare, **Linux**

EXPERIENCE

LookAround.in

Feb 2026 - Present

Backend Engineer Intern (Remote)

Bengaluru, Karnataka

- Built and maintained backend systems for LookAround's core platform — scalable API design, database architecture, and server-side logic using **Node.js**, **Next.js 14**, **TypeScript**, and **PostgreSQL**.
- Developed [efm.eirs.app](#), a full-stack equestrian facility application featuring a **4-level approval hierarchy**, SLA-based task escalation, and **RBAC**, utilizing **AWS S3** for watermarked media storage and real-time system notifications.
- Built [ai-cavalli.eirs.app](#), a restaurant management system featuring a custom **PIN-based authentication** engine, secure session management, and granular **RBAC** for Kitchen, Admin, and Customer roles using **Next.js** and **Supabase PostgreSQL**.
- Engineered [event.eirs.app](#), a production-ready equestrian event backend with **20+ Prisma models**, featuring **JWT auth**, Vercel-optimized connection pooling, schema-based validation, and comprehensive audit logging for financial transactions.

GrowthPurple Technologies

Jun 2025 – Oct 2025

SDE Intern

Remote

- Built [gstping.com](#), a **SaaS platform** automating GST filing reminders for Indian SMEs, featuring **Razorpay** payment integration, **Laravel**-based task scheduling, and **Twilio** email/SMS/WhatsApp notifications.
- Built a [UxDots.io](#) AI-powered design generation platform that converts natural language prompts into responsive UX Design using **Next.js**, **Tailwind CSS**, and the **Anthropic Claude API**, streamlining the UI ideation process for designers.

PROJECTS

Realtime Whiteboard (Miro Dev)

June 2025

Techstack: Liveblocks, Next.js, Convex

- Built a **responsive, intuitive UI** with **React**, **TypeScript**, and **TailwindCSS** for a seamless user experience.
- Developed a **real-time collaborative whiteboard** using **Liveblocks** and **Convex** for low-latency multi-user interaction and scalable data handling.

WhiteSpace

Aug 2024

Techstack: React.js, Cloudflare Workers, TailwindCSS, PostgreSQL, Node.js

- Developed **WhiteSpace**, a minimalist blogging platform providing a **seamless** writing and reading experience with intuitive navigation and responsive design.
- Built a **scalable serverless backend** with secure authentication and efficient data handling, ensuring high performance and reliability.

COURSEWORK AND ACHIEVEMENTS

- **Core Subjects**: Data Structures, CN, Object-Oriented Programming, Database Management Systems.
- **Problem Solving**: Solved 300+ coding problems on LeetCode and GeeksforGeeks, demonstrating strong analytical and optimization skills.
- **Competitive Programming** : Top 68.15% globally on **LeetCode** with (max 1437) rating.
